

Building Work Supervisor Standard Registration Conditions

The *Building Work Contractors Act 1995* allows for registrations which authorise a person to supervise building work of any kind (Any Building Work) and for registrations with conditions which may limit the scope of building work (all other registration conditions).

This document has been created with reference to:

- [Building Work Contractors Act 1995](#) and [Building Work Contractors Regulations 2011](#)
- [The National Construction Code](#) (Building Code of Australia volumes 1 & 2)
- [The Australian Standards](#)
- [National Dictionary of Building & Plumbing Terms](#)
- The Glossary of Building Terms and Building Technologies that are deemed to comply with the National Construction Code (NCC)

General Building Work Registrations covers more complex building work in the supervision and coordination of other trades. The supervisor takes responsibility for providing proper supervision over the complete building processes. The general condition may be limited by height, type or class of building.

Specified Building Work Registrations covers one or more building trades or building activities and take responsibility for providing proper supervision over the building processes.

This document sets out the 'scope of work' of conditions that will be used on your registration card and the qualification/experience pathways to obtain the 'scope of work' condition.

How to use

When you are making an application for registration as a building work supervisor, or looking to change the conditions of your current registration, you should:

1. Identify the condition(s) that best matches your onsite experience for the scope of work you are seeking.
2. Examine the qualification/experience pathway(s) for each condition and provide all relevant professional or trade qualifications.
3. Include a comprehensive relevant Work History and Onsite Experience Record document which demonstrates your on-site experience specifically related to each of the conditions applied for. This will give the Commissioner's Technical Officer a better understanding of your relevant on-site building knowledge and experience to determine whether an interview is to be conducted.

Demonstration of knowledge and experience

For the purposes of assessing an applicant's knowledge and experience against the Performance Criteria in Part 2 of Schedule 2 of the [Building Work Contractors Regulations 2011](#), the Commissioner for Consumer Affairs (the Commissioner) has approved the qualification pathways outlined in this document. Pathways including "must be met in full to be entitled to attend a building interview" require an applicant to first demonstrate knowledge and experience through satisfactory completion of a Work History and On-site Experience Record – including the stated number of projects and years of experience, before they may be entitled to attend a supervisor interview. Applicants who fail to meet the knowledge and experience requirements defined by a pathway within this document **will not be entitled to attend a building interview**.

The building interview is conducted in accordance with Schedule 2, which includes Building Work Management (section 1), Building Technology (section 2) and Legislative Requirements (section 3).

The Commissioner's Technical Officer will conduct an assessment of an applicant's knowledge and on-site building experience to determine eligibility for the applied for condition(s). This will include, but not be limited to,

the knowledge and application of codes, construction methods and industry standards relevant to the type of building work applied for.

The [Building Work Contractors Act 1995](#) (the Act) provides the following definitions in relation to a building work supervisor registration:

building includes a wall or structure and part of a building or structure;

building work means—

- (a) the whole or part of the work of constructing, erecting, underpinning, altering, repairing, improving, adding to or demolishing a building; or
- (b) the whole or part of the work of excavating or filling a site for work referred to in paragraph (a); or
- (c) work of a class prescribed by regulation;

Commissioner means the Commissioner for Consumer Affairs;

domestic building work means—

- (a) the whole or part of the work of constructing, erecting, underpinning, altering, repairing, improving, adding to or demolishing a house; or
- (b) the whole or part of the work of excavating or filling a site for work referred to in paragraph (a); or
- (c) work of a class prescribed by regulation;

house means a building intended for occupation as a place of residence but does not include a building of a class prescribed by regulation;

material, in relation to building work, includes goods to be supplied and fitted or installed in the course of the building work;

minor domestic building work means—

- (a) domestic building work performed or to be performed under a domestic building work contract at a cost to the building owner that is less than the sum prescribed by regulation; or
- (b) domestic building work performed or to be performed by a building work contractor on the contractor's own behalf where the cost of the work would, if it were performed under contract, be less than the sum prescribed by regulation; (currently \$12,000)

perform, in relation to building work, includes—

- (a) cause building work to be performed; or
- (b) organise or arrange for the performance of building work.

The [Building Work Contractors Regulations 2011](#) (the Regulations) provides additional detail to the Act.

For the purposes of the definition of **building work** in the Act, the following is building work:

- (a) the on-site construction, alteration, repair or improvement of a swimming pool or spa;
- (b) paving;
- (c) fencing (excluding post and wire fencing);
- (d) the installation, maintenance, repair and removal of insulation;
- (e) painting a building or part of a building;
- (f) the installation of air-conditioning in relation to a building;
- (g) the installation of solar panels in relation to a building;
- (h) plumbing, gas fitting and electrical work within the meaning and application of the *Plumbers, Gas Fitters and Electricians Act 1995*.

There is additional information in the Regulations in relation to the term 'domestic building work'. Please refer to section 4 of the Regulations for this detail.

The Regulations also highlight exemptions under the Act and include:

- A person who is authorised by a security agents licence or a restricted security agents licence to install or maintain security alarm or surveillance systems under the Security and Investigation Agents Act 1995 (currently under the Security and Investigation Industry Act 1995) is exempt from the requirements to hold a building work contractor's licence.
- Registered Architects (registered in South Australia).
- The installation, maintenance, repair or removal of a floating floor under a contract entered into on or after 1 April 2010.

floating floor means a floor covering comprised of boards designed to be laid over a floor without being fixed to the floor.

- The installation, maintenance, repair or removal of carpet or of vinyl floor covering in circumstances in which it is not used for water proofing.
- For additional exemptions please refer to section 5 of the Regulations.

storey means a space within a building situated between 1 floor level and the floor level next above, or if there is no floor above, the ceiling or roof above, but does not include—

- (a) a space that contains only—
 - (i) a lift shaft, stairway or meter room; or
 - (ii) a bathroom, shower room, laundry, water closet or other sanitary compartment; or
 - (iii) accommodation intended only for vehicles; or
 - (iv) a combination of any of the facilities referred to in 1 or more of the above subparagraphs; or
- (b) a mezzanine.

The **Australian Standards** and **National Construction Code** provide the following definitions:

Single storey construction with wall height, excluding any gable, not exceeding 4.2m and including only one trafficable floor (Australian Standard).

Two storey construction with wall height, including any gable, not exceeding 8.5m and including two trafficable floors (Australian Standard).

A **mezzanine floor** is not considered a storey if it covers no more than 1/3 of the floor area below or a maximum of 200m² and isn't divided into office space or have anything more than a balustrade between its outer edge and the floor below (NCC).

Wet area - means an area within a building supplied with water from a water supply system, which includes bathrooms, showers, laundries and sanitary compartments and excludes kitchens, bar areas, kitchenettes or domestic food and beverage preparation areas (NCC)

Proper Supervision

Proper supervision applies to all levels of building work licences as outlined in this document. The registered building work supervisor provides proper supervision in relation to the contractor's business and must hold a registration which authorises the supervision of that building work. A registered architect is taken to hold an unrestricted building work supervisor registration and may be nominated to cover the supervision of a building work contractor without holding a registration.

Section 12 of the Act requires that a building work contractor must ensure that the building work endorsed to their licence is supervised by a registered and approved supervisor at all times during the currency of the licence.

Disciplinary action may also be taken against the building work supervisor if the supervisor has acted unlawfully, improperly, negligently or unfairly while acting as a building work supervisor.

NATIONAL CONSTRUCTION CODE (NCC)

BUILDING CLASSIFICATIONS

CLASS	NCC
Class 1	One or more buildings, which in association constitute
Class 1a	A single dwelling being: <ul style="list-style-type: none"> (i) a detached house; or (ii) one of a group of two or more attached dwellings, each being a building, separated by a fire-resisting wall, including a row house, terrace house, town house or villa unit:
Class 1b	<ul style="list-style-type: none"> (i) a boarding house, guest house, hostel or the like: <ul style="list-style-type: none"> (A) with a total area of all floors not exceeding 300m² measured over the enclosing walls of the Class 1b; and (B) in which not more than 12 persons would ordinarily be resident, or (ii) 4 or more single dwelling located on one allotment and used for short-term holiday accommodation which are not located above or below another dwelling or another Class of building other than a private garage.
Class 2	A building containing 2 or more sole-occupancy units each being a separate dwelling
Class 3	A residential building, other than a building of Class 1 or 2, which is a common place of long term or transient living for a number of unrelated persons, including <ul style="list-style-type: none"> (a) a boarding-house, guest house, hostel, lodging-house or backpackers accommodation; or (b) a residential part of a hotel or motel; or (c) a residential part of a school; or (d) accommodation for the aged, children or people with disabilities; or (e) a residential part of health-care building which accommodates members of staff; or (f) a residential part of a detention centre.
Class 4	A dwelling in a building that is Class 5,6,7,8 or 9 if it is the only dwelling in the building
Class 5	An office building used for professional or commercial purposes, excluding buildings of Class 6,7,8 or 9
Class 6	A shop or other building for the sale of goods by retail or the supply of services direct to the public, including <ul style="list-style-type: none"> (a) an eating room, café, restaurant, milk or soft-drink bar; or (b) a dining room, bar area that is not an assembly building, shop or kiosk part of a hotel or motel; or (c) a hairdresser's or barber's shop, public laundry, or undertaker's establishment; or (d) market or sale room, showroom, or service station.
Class 7a	A building which is a car park.
Class 7b	A building which is for storage, or display of goods or produce for sale by wholesale.
Class 8	A laboratory, or a building in which a handicraft or process for production, assembling, altering, repairing, packing, finishing, or cleaning of goods or produce is carried on for trade, sale, or gain.
Class 9	A building of a public nature
Class 9A	(a) a health-care building, including those parts of the building set aside as a laboratory;
Class 9B	(b) an assembly building, including a trade workshop, laboratory or the like in a primary or secondary school, but excluding any other parts of the building that are of another Class;
Class 9C	(c) an aged care building
Class 10	A non-habitable building or structure
Class 10A	(a) a non-habitable building being a private garage, carport, shed, or the like; or
Class 10B	(b) a structure being a fence, mast, antenna, retaining or free-standing wall, swimming pool, or the like; or
Class 10C	(c) a private bushfire shelter.

COMMERCIAL BUILDING WORK LTD TO NATIONAL CONSTRUCTION CODE CLASS 2 - 9 NOT EXCEEDING ONE STOREY

Scope of work	Qualifications and experience
<p>Commercial building work restricted to classes 2-9 buildings, not exceeding one storey.</p> <p>Includes construction, alteration, addition to and renovation of class 2 - 9 not exceeding one storey buildings and incidental civil construction to that building work. Also includes residential apartments as per the National Construction Code volume one.</p> <p>.</p> <p><i>Regulations – Schedule 2 Part 3.3(b)(ii)(B)</i></p>	<p>Pathway 1 (must be met in full to be entitled to attend a building interview) Completion of an Australian-based trade apprenticeship (ie. Carpentry & Joinery, Bricklaying)</p> <p>AND Holds a CPC40120 - Certificate IV in Building and Construction or related higher-level qualification</p> <p>AND Completion of all of the following units of competency in addition to the above qualification:</p> <ul style="list-style-type: none"> CPCCBC5003 - Supervise the planning of on-site building and construction work <p>AND Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record including a minimum of three years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 2 (must be met in full to be entitled to attend a building interview) Completion of an Australian-based trade apprenticeship (ie. Carpentry & Joinery, Bricklaying)</p>

	<p>AND Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record including a minimum of four years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 3 (must be met in full to be entitled to attend a building interview) Holds a CPC40120 - Certificate IV in Building and Construction or related higher-level qualification (without a trade qualification). AND Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record including a minimum of five years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 4 (must be met in full to be entitled to attend a building interview) Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record including a minimum of six years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 5 Held an equivalent registration within 12 months prior to this application</p>
--	--

ADDITIONS LTD TO COMMERCIAL NATIONAL CONSTRUCTION CODE CLASS 2 - 9

Scope of work	Qualifications and experience
<p>Commercial additions restricted to classes 2-9 buildings Expanding the floor area, below, at the same level and/or above an existing building and enclosing other areas. A change to a building or facility which increases its external dimension and cubic content e.g. Increasing the floor area of an existing building and/or enclosing other areas. Limited to class 2-9 buildings.</p> <p>This condition may be limited in height depending on experience.</p>	<p>Pathway 1 (must be met in full to be entitled to attend a building interview) Completion of an Australian-based trade apprenticeship (ie. Carpentry & Joinery, Bricklaying) AND Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record including a minimum of four years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 2 (must be met in full to be entitled to attend a building interview) Holds a CPC40120 - Certificate IV in Building and Construction or related higher-level qualification (without a trade qualification). AND Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record including a minimum of five years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 3 (must be met in full to be entitled to attend a building interview) Demonstration of knowledge and experience through satisfactory completion of the</p>

	<p>Work History & Onsite Experience record including a minimum of six years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 4 Held an equivalent registration within 12 months prior to this application</p>
--	---

COMMERCIAL FIT OUTS

Scope of work	Qualifications and experience
Internal non-structural demolition and renovation (including some structural alteration where it doesn't involve the alteration to the main structural fabric of the building) of class 2 - 9 buildings.	<p>Pathway 1 Completion of an Australian-based apprenticeship - Carpentry and/or Joinery AND CPC30120 - Certificate III in Shop fitting</p> <p>Pathway 2 (must be met in full to be entitled to attend a building interview) Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record including a minimum of four years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application</p>

CIVIL BUILDING WORK

CIVIL CONSTRUCTION

Scope of work	Qualifications and experience
<p>Includes all civil work without restriction e.g. bridges, tunnels & major public road networks. Construction of a structure such as a dam, bridge, road, railway, runway, utilities, pipeline, or sewage system. Includes buildings associated with electrical control rooms and pump rooms. Building associated site works site preparation, footing preparation piles or piers associated with the structure of the building.</p> <p>Construction of roads – includes kerbing, gutters, side entry pits, paving, retaining walls and rock anchors or similar.</p> <p>Includes civil construction for land sub-divisions, streetscapes & carparks and marine structures.</p> <p>May also include installation and repair of civil building work.</p> <p>Doesn't include the physical performance of plumbing, gas fitting or electrical work unless registered to perform that work under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p>	<p>Pathway 1 (must be met in full to be entitled to attend a building interview) Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record including a minimum of five years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application</p>

CIVIL CONSTRUCTION FOR LAND SUB-DIVISION STREETSCAPES & CAR PARKS

Scope of work	Qualifications and experience
<p>Land sub-division, access roads and earthworks associated with installation of services for subdivisions.</p> <p>Street scapes, paving of foot paths, car parks including stormwater, kerbing and gutters and earthworks and relocation services.</p> <p>(formally Civil construction medium)</p> <p>Doesn't include the physical performance of plumbing, gas fitting or electrical work unless registered to perform that work under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p>	<p>Pathway 1 (must be met in full to be entitled to attend a building interview) Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record including a minimum of five years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application</p>

CIVIL CONSTRUCTION FOR STREETSCAPES & CARPARKS

Scope of work	Qualifications and experience
<p>Street scapes, paving of foot paths, car parks including stormwater, kerbing and gutters and earthworks and relocation services.</p> <p>(formally Civil construction low)</p> <p>Doesn't include the physical performance of plumbing, gas fitting or electrical work unless registered to perform that work under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p>	<p>Pathway 1 (must be met in full to be entitled to attend a building interview) Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record including a minimum of five years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application</p>

CIVIL CONSTRUCTION FOR MARINE STRUCTURES

Scope of work	Qualifications and experience
<p>Any civil construction associated with the Marine environment - Covers Installation of wharves and jetties, groynes, boat ramps, shoreline stabilisation, and onshore marine support infrastructure eg the building of fuel supply facilities (holding tanks, delivery pipe works and bowsers) in marinas, carparks and water supplies.</p> <p>Doesn't include the physical performance of water plumbing work unless registered to perform that work under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p>	<p>Pathway 1 (must be met in full to be entitled to attend a building interview) Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record including a minimum of five years' experience and five completed projects relevant to the scope of work.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application</p>

Specified Trade Conditions

Regulations – Schedule 2 Part 3.3(d)

AIR CONDITIONING

AIR CONDITIONING INSTALLATION

Scope of work	Qualifications and experience
<p>Installation of fixed appliances that circulate airflow within a building that provide heating and/or cooling of the building space. Includes, roof mounted or high wall split systems, ventilation systems, ducting and dampers and return air systems. Excludes the building of a cool room.</p> <p>Doesn't include the physical performance of associated plumbing, gas fitting or electrical work unless registered to perform that work under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p> <p><i>Regulations 4(1)(f)</i></p>	<p>Pathway 1 Completion of Australian-based apprenticeship - Air-conditioning and Refrigeration Tradesperson</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

AIR CONDITIONING INSTALLATION LTD TO WALL OR GROUND MOUNTED SPLIT SYSTEMS

Scope of work	Qualifications and experience
<p>Installation of split system air-conditioner systems other than systems mounted in or on a roof.</p> <p>Excludes in roof ducting</p> <p>Doesn't include the physical performance of associated plumbing, gas fitting or electrical work unless registered to perform that work under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p>	<p>Pathway 1 Completion of Traineeship - Split Air-conditioning and Heat Pump Systems Installer</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

BOARD FIXING AND FLUSHING

BOARD FIXING & FLUSHING AND INSTALLATION OF NON-STRUCTURAL WALL FRAMES

Scope of work	Qualifications and experience
Fixing and flushing of plasterboard and other types of lining sheets, cornices, suspended ceilings and fire walls in commercial and residential buildings. Includes the construction of non- structural wall frames and installation of insulation in walls and ceilings.	Pathway 1 Completion of Australian-based apprenticeship - Plastering (Wall and Ceiling Lining) Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 3 Held an equivalent registration within 12 months prior to this application.

BOARD FIXING & FLUSHING LTD TO RESIDENTIAL

Scope of work	Qualifications and experience
Fixing and flushing of plasterboard and other types of lining sheets and cornices (including ceiling rose or centre piece) in residential buildings. Includes the installation of insulation in walls and ceilings.	Pathway 1 Completion of Australian-based apprenticeship - Plastering (Wall and Ceiling Lining) Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 3 Held an equivalent registration within 12 months prior to this application.

BRICKLAYING, BLOCK LAYING AND MASONRY

BRICKLAYING & BLOCK LAYING

Scope of work	Qualifications and experience
<p>The laying of all forms of manufactured brick or blocks with no restriction in height or class of building. Includes undersetting.</p> <p>Does not include stone masonry (refer to scope of work for stone masonry).</p>	<p>Pathway 1 Completion of Australian-based apprenticeship - Bricklaying.</p> <p>Pathway 2 Offshore Technical Skills Record (OTSR) – Bricklayer and Certificate III in Bricklaying and Blocklaying evidencing completion of nominated gap training requirements.</p> <p>Pathway 3 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 4 Held an equivalent registration within 12 months prior to this application.</p>

BRICKLAYING LTD TO 1M IN HEIGHT

Scope of work	Qualifications and experience
<p>The laying of non-structural brick or block walls up to 1m in height for garden walls, flower boxes or the like.</p> <p>Note: a free-standing wall cannot be used as a fence between properties (refer to Fencing for an appropriate condition) and is not to be used for retaining purpose (refer to Retaining Walls for an appropriate condition).</p>	<p>Pathway 1 Completion of Australian-based apprenticeship - Bricklaying.</p> <p>Pathway 2 Offshore Technical Skills Record (OTSR) – Bricklayer and Certificate III in Bricklaying and Blocklaying evidencing completion of nominated gap training requirements.</p> <p>Pathway 3 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 4 Held an equivalent registration within 12 months prior to this application.</p>

MASONRY LTD TO FREE-STANDING WALLS

Scope of work	Qualifications and experience
<p>Construction of free-standing walls using natural stone, bricks or blocks or the like and Includes cutting, dressing, laying, jointing and pointing and rendering of the wall.</p> <p>May also include a freestanding Gabion wall.</p> <p>The free-standing wall cannot be used as a fence between properties (refer to Fencing for an appropriate condition) and is not to be used for retaining purpose (refer to Retaining Walls for an appropriate condition).</p> <p>This condition may be limited to 1 metre in height or may be unrestricted.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

STONEMASONRY

Scope of work	Qualifications and experience
<p>Construction and undersetting of walls using natural stone (non-manufactured masonry units) in lieu of bricks or blocks. Includes cast, synthetic or reconstructed stone matching or imitation natural stone and includes cutting, dressing, laying, jointing and pointing.</p>	<p>Pathway 1 Completion of an Australian-based apprenticeship - Stone Masonry and/or Carving and/or Letter Cutting</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

STONE VENEER INSTALLATION

Scope of work	Qualifications and experience
<p>Fixing a veneer of non-structural stone to the face of a building.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview..</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

UNDERSETTING

Scope of work	Qualifications and experience
Removal and replacement of salt damp affected masonry incorporating a new damp proof membrane.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

CABINET MAKING

CABINET MAKING

Scope of work	Qualifications and experience
Onsite fabrication and/or installation of built-in furniture, e.g. kitchens, linen presses, laundry cupboards or the like. Includes the installation of all forms of bench tops.	Pathway 1 Completion of an Australian-based apprenticeship - Cabinet Maker (Bathrooms and Kitchens) Pathway 2 Offshore Technical Skills Record (OTSR) – Cabinet Maker and Certificate III in Cabinet Making evidencing completion of nominated gap training requirements. Pathway 3 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 4 Held an equivalent registration within 12 months prior to this application.

BENCHTOP INSTALLATION

Scope of work	Qualifications and experience
Installing natural stone, concrete or composite materials to form a benchtop of a cabinet (does not include cabinet making).	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

CARPENTRY AND JOINERY

CARPENTRY, LIGHT STEEL FRAMING AND JOINERY

Scope of work	Qualifications and experience
<p>1st fix carpentry including the structural floor (including stumping), wall and roof framing (conventional and truss roof) and fascias, verandahs, pergolas, carports and decks using timber.</p> <p>2nd fix carpentry including the Installation of doors and door hardware, locks, architraves and skirting and the installation of eaves, screen doors, screens, bi-fold doors and operable walls and bathroom fittings. The installation and repair of timber flooring and floor systems including timber flooring fixed to existing joists or installed to battens or sheet substrate for strip timber flooring (over an existing floor substrate) and floor finishing.</p> <p>Light steel framing, defined as pressed metal framing in which the width and thickness of the members doesn't exceed 100mm and some structural steel where required in timber framed construction. Normally used as an alternative to timber in 1st fix carpentry.</p> <p>Joinery - Installation of built-in furniture (as for cabinet making) includes installation of staircases, windows and doors no limitation of height of class of building.</p> <p>No limitation of height or class of building.</p>	<p>Pathway 1 Completion of an Australian-based apprenticeship - Carpentry and/ or Joinery AND Certificate III in Carpentry and Joinery</p> <p>Pathway 2 Offshore Technical Skills Record (OTSR) – Carpenter and Joiner and Certificate III in Carpentry and Joinery evidencing completion of nominated gap training requirements.</p> <p>Pathway 3 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 4 Held an equivalent registration within 12 months prior to this application.</p>

CARPENTRY AND LIGHT STEEL FRAMING

Scope of work	Qualifications and experience
<p>1st fix carpentry including the structural floor (including stumping), wall and roof framing (conventional and truss roof) and fascias, verandahs, pergolas, carports and decks using timber.</p> <p>2nd fix carpentry including the Installation of doors and door hardware, locks, architraves and skirting and the installation of eaves, screen doors, screens, bi-fold doors and operable walls and bathroom fittings. The installation and repair of timber flooring and floor systems including timber flooring fixed to existing joists or installed to battens or sheet substrate for strip timber flooring (over an existing floor substrate) and floor finishing.</p> <p>Light steel framing, defined as pressed metal framing in which the width and thickness of the members doesn't exceed 100mm and some structural steel where required in timber framed construction. Normally used as an alternative to timber in 1st fix carpentry.</p> <p>No limitation of height or class of building.</p>	<p>Pathway 1 Completion of an Australian-based apprenticeship - Carpentry and/ or Joinery AND Certificate III in Carpentry</p> <p>Pathway 2 Offshore Technical Skills Record (OTSR) – Carpenter and Certificate III in Carpentry evidencing completion of nominated gap training requirements.</p> <p>Pathway 3 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 4 Held an equivalent registration within 12 months prior to this application.</p>

LIGHT STEEL FRAMING

Scope of work	Qualifications and experience
Installation of light steel framing, steel framed curtain walls in commercial buildings and non-load bearing steel frames used in commercial fit outs. Light steel framing is defined as pressed metal framing in which the width and thickness of the members doesn't exceed 100mm and some structural steel where required. Light steel framing is normally used as an alternative to timber in 1 st fix carpentry.	<p>Pathway 1 Completion of an Australia-based apprenticeship - Carpentry and/ or Joinery AND Certificate III in Carpentry</p> <p>Pathway 2 Offshore Technical Skills Record (OTSR) – Carpenter and Certificate III in Carpentry evidencing completion of nominated gap training requirements.</p> <p>Pathway 3 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 4 Held an equivalent registration within 12 months prior to this application.</p>

CARPENTRY LTD TO SECOND FIX

Scope of work	Qualifications and experience
2nd fix carpentry including the Installation of doors and door hardware, locks, architraves and skirting and the installation of eaves, screen doors, screens, bi-fold doors and operable walls and bathroom fittings. The installation and repair of timber flooring and floor systems including timber flooring fixed to existing joists or installed to battens or sheet substrate for strip timber flooring (over an existing floor substrate) and floor finishing.	<p>Pathway 1 Completion of an Australia-based apprenticeship - Carpentry and/ or Joinery AND Certificate III in Carpentry</p> <p>Pathway 2 Offshore Technical Skills Record (OTSR) – Carpenter and Certificate III in Carpentry evidencing completion of nominated gap training requirements.</p> <p>Pathway 3 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 4 Held an equivalent registration within 12 months prior to this application.</p>

FIXING OF CLADDING

Scope of work	Qualifications and experience
Fixing all types of wall sheet external claddings. E.g. Autoclaved Aerated Concrete (AAC) panels, other lightweight sheet materials.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

JOINERY

Scope of work	Qualifications and experience
Installation of built-in furniture (as for cabinet making) includes installation of staircases, windows and doors. No limitation of height of class of building.	<p>Pathway 1 Completion of an Australian-based apprenticeship - Carpentry and/ or Joinery. AND Certificate III in Joinery</p> <p>Pathway 2 Offshore Technical Skills Record (OTSR) – Joiner and Certificate III in Joinery evidencing completion of nominated gap training requirements.</p> <p>Pathway 3 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 4 Held an equivalent registration within 12 months prior to this application.</p>

BALUSTRADES

Scope of work	Qualifications and experience
Installing balustrades (including timber, stainless steel, glass, tubular and metal) to decks, balconies, staircases and mezzanine floors.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application</p>

STAIRS & BALUSTRADES LTD TO TIMBER, METAL, PLASTIC & GLASS CONSTRUCTION

Scope of work	Qualifications and experience
Installations of stairs & balustrades limited to timber, metal, plastic & glass construction.	<p>Pathway 1 Completion of an Australian-based trade apprenticeship - Carpentry and/or Joinery AND CPCCJN3005 Cut and install glass</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

WINDOW & DOOR INSTALLATION

Scope of work	Qualifications and experience
Installation of windows and doors into existing openings includes installation of glass and automated doors. Includes fire doors. Does not allow increasing the height or width of openings. If alteration to height or width of openings is required refer to alterations.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

DECKS

Scope of work	Qualifications and experience
Construction of decks - horizontal platform, free standing or attached to ground floor level of a building. Includes balustrades and external stairs.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

DECKS LTD TO 1M IN HEIGHT

Scope of work	Qualifications and experience
Construction of decks - horizontal platform, free standing or attached to ground floor level of a building limited to 1m above adjoining ground level.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application</p>

FLOOR FINISHING

Scope of work	Qualifications and experience
<p>Grinding, sanding and polishing or sealing timber or concrete floors; and concrete resurfacing in any environment; and application of direct stick flooring (solid timber units glued to an existing sub state).</p> <p>Please note: Floating floors that are installed, maintained, repaired or removed are exempt.</p> <p>floating floor means a floor covering comprised of boards designed to be laid over a floor without being fixed to the floor.</p> <p>Carpet or of vinyl floor covering which are installed, maintained, repaired or removed are also exempt in circumstances when they are not used for water proofing.</p> <p><i>Regulations 5(11) and 5(12)</i></p>	<p>Pathway 1 Completion of an Australian-based apprenticeship - Floor Finisher AND Certificate III in Flooring Technology</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application</p>

CONCRETE WORK

GENERAL CONCRETE CONSTRUCTION

Scope of work	Qualifications and experience
Any concrete work without limitation. Includes site preparation, trenching, installation of damp proof membrane, formwork, installation of reinforcing and placing and finishing of all concrete construction e.g. concrete work on ground and above ground associated with residential, commercial and civil construction.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application

TILT PANEL CONSTRUCTION

Scope of work	Qualifications and experience
Manufacture on site and installation of precast panels. Includes the installation of precast panels manufactured off site.	Pathway 1 CPC30320 Certificate III in Concreting And <ul style="list-style-type: none">• CPCCSF3001 Apply reinforcement schedule• CPCCON3048 Construct tilt panels on site• CPCCOM1016 Identify requirements for safe precast and tilt-up work Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 3 Held an equivalent registration within 12 months prior to this application.

FOOTING CONSTRUCTION

Scope of work	Qualifications and experience
Site preparation, trenching, installation of Damp Proof Membrane, installation of reinforcing and placing and finishing of concrete for footings and slabs. Includes underpinning and screw piling.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application

CONCRETING & STEEL FIXING

Scope of work	Qualifications and experience
Any concrete and steel fixing work without limitation. Includes installation of reinforcing and placing and finishing of all concrete construction.	<p>Pathway 1 Completion of an Australian-based apprenticeship - Concreter AND CPCCSF3001 Applying reinforcement schedule.</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

CONCRETE FLOORS LTD TO SUSPENDED FLOORS UP TO TWO STOREY

Scope of work	Qualifications and experience
Formwork (including lost formwork), steel fixing, placement and finishing of suspended concrete floors up to and including two storey.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

PRECAST CONCRETE UNIT INSTALLATION

Scope of work	Qualifications and experience
Installation of precast concrete units such as beams, panels, floor units and columns.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

CONCRETE FLOOR PAVING

Scope of work	Qualifications and experience
Non-structural concrete floors such as shed floors or floors that are not part of the main building structure. Includes earthworks preparation and may include terrazzo flooring and spray & seal concrete.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

STEEL FIXING

Scope of work	Qualifications and experience
Installing reinforcing requirements for structural concrete in all classes of building.	Pathway 1 Completion of Traineeship - Steel Fixer AND Certificate III in Steel fixing Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 3 Held an equivalent registration within 12 months prior to this application.

FORMWORK

Scope of work	Qualifications and experience
Installation and removal of a structure, either temporary or permanent (lost formwork), provided to contain fresh concrete and support it in the required shape and size until it is able to support the loads upon it.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

UNDERPINNING

Scope of work	Qualifications and experience
Installation of a support under an existing structure, walls, columns, or footings of a building. A structure may be underpinned to prevent collapse due to excessive settlement or other failure of the supporting foundation, to allow the loads of an existing building to be increased or to allow the ground level under or outside an existing building to be lowered.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

DEMOLITION

DEMOLITION

Scope of work	Qualifications and experience
Complete or partial dismantling of a building by pre-planned and controlled methods or procedures.	<p>Pathway 1 Completion of Traineeship - Construction Worker (Demolition)</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

DEMOLITION NOT EXCEEDING TWO STOREY

Scope of work	Qualifications and experience
Complete or partial dismantling of a building not exceeding two storey by pre-planned and controlled methods or procedures.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

DEMOLITION NOT EXCEEDING ONE STOREY

Scope of work	Qualifications and experience
Complete or partial dismantling of a building not exceeding one storey by pre-planned and controlled methods or procedures.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

DEMOLITION NON-STRUCTURAL

Scope of work	Qualifications and experience
Demolition associated with residential and commercial fit out and room renovations. Excludes demolition of load bearing components.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

EARTHWORKS CONSTRUCTION

EARTHWORKS CONSTRUCTION

Scope of work	Qualifications and experience
<p>All forms of earthworks without restriction. Site preparation, excavating and trenching associated with residential and commercial building work and all earthworks associated with civil construction.</p> <p>Doesn't include the physical performance of associated plumbing, gas fitting or electrical work unless registered to perform that work under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p> <p>Note: Earthworks machine operation is regulated by SafeWork SA.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

EARTHWORKS CONSTRUCTION LTD TO SITE PREPARATION, EXCAVATION & TRENCHING

Scope of work	Qualifications and experience
<p>Earthworks related to site preparation for residential and commercial building work, e.g. levelling, trenching for footings and other services, swimming pools, cellars and septic tanks/enviro-cycles or preparation for on-site building work.</p> <p>Doesn't include the physical performance of associated plumbing, gas fitting or electrical work unless registered to perform that work under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p> <p>Note: Earthworks machine operation is regulated by SafeWork SA.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

FENCING

FENCING

Scope of work	Qualifications and experience
All forms of fencing and gates including plinth installation. Excludes post and wire fencing <i>Regulations 4(1)(c)</i>	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

FENCING EXCLUDING BRICK AND BRUSH

Scope of work	Qualifications and experience
All forms of fencing and gates excluding brick and brush and post & wire fencing	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

FENCING EXCLUDING BRICK, BRUSH AND POOL FENCING

Scope of work	Qualifications and experience
All forms of fencing and gates other than brick or brush and excludes pool fencing, and post & wire fencing.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

FENCING EXCLUDING POOL FENCING

Scope of work	Qualifications and experience
All forms of fencing and gates excluding pool fencing and post & wire fencing	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

POOL FENCING

Scope of work	Qualifications and experience
Includes all types of pool fencing and gates including the installation of footings, brackets and frames. Excludes other types of fencing	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

INSULATION

INSULATION

Scope of work	Qualifications and experience
Installation of insulation in all classes of buildings in walls and ceilings. <i>Regulations 4(1)(d)</i>	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

INSULATION LTD TO RESIDENTIAL CEILINGS

Scope of work	Qualifications and experience
Installation of all types of insulation in residential ceilings only. (Mandatory qualification plus demonstration of experience for this condition).	Pathway 1 <ul style="list-style-type: none"> CPCCCM2012 Work safely at heights CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry CPCCPB3014 Install batt insulation products or CPCCPB3014 - Install bulk insulation and pliable membrane products AND Detailed references on role and experience in ceiling insulation work. Pathway 2 <ul style="list-style-type: none"> CPCCPB3027A Install ceiling insulation or CPCCPB3027 - Install ceiling insulation products AND Detailed references on role and experience in ceiling insulation work. Pathway 3 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 4 Held an equivalent registration within 12 months prior to this application.

PAINTING AND DECORATING

PAINTING AND DECORATING

Scope of work	Qualifications and experience
Internal and external surface preparation and painting, includes painting of wall and floor tiles, baths and laminates with no restriction to class of building. Excludes roof restoration other than painting. Decorating includes such techniques as marbling, gold leaf, murals and wall papering.	Pathway 1 Completion of an Australian-based apprenticeship - Painting & Decorating Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 3 Held an equivalent registration within 12 months prior to this application.

PAINTING

Scope of work	Qualifications and experience
Internal and external surface preparation and painting, includes the painting of wall and floor tiles, baths and laminates with no restriction to class of building. Excludes roof restoration other than painting. <i>Regulations 4(1)(e)</i>	Pathway 1 Completion of an Australian-based apprenticeship - Painting & Decorating Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 3 Held an equivalent registration within 12 months prior to this application.

PROTECTIVE COATINGS (INCLUDING FIRE PROOFING MATERIALS)

Scope of work	Qualifications and experience
Protective Coatings includes fire proofing material, intumescent paint, spray fireproofing and the like.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

PAVING

PAVING

Scope of work	Qualifications and experience
<p>All forms of paving, segmental, concrete (includes concrete path/floor paving), bitumen (laying of asphalt and spray seal on roads), pattern pave and spray on pave. Includes site preparation, reinforcement and formwork.</p> <p>Concrete path paving - Concrete work to paths and driveways without restriction. Includes earthworks preparation, exposed aggregate finish, sealing, crossovers and kerbs.</p> <p>Concrete floor paving - Non-structural concrete floors such as shed floors or floors. Includes earthwork preparation and may include terrazzo flooring and spray & seal concrete.</p> <p><i>Regulations 4(1)(b)</i></p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

BRICK/SEGMENTAL PAVING

Scope of work	Qualifications and experience
<p>The laying of all forms of segmental paving, whether brick, clay concrete, stone or other type of paver, includes site preparation, earthworks, sealing and finishing.</p> <p>Does not include concrete path paving.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

CONCRETE PATH PAVING

Scope of work	Qualifications and experience
<p>Concrete work to paths and driveways without restriction. Includes earthworks preparation, exposed aggregate finish, sealing, crossovers and kerbs.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

BITUMEN PAVING

Scope of work	Qualifications and experience
Laying and repairing of a bitumen/asphalt surface. Bitumen/asphalt includes spray seal on roads and bitumen paving to other areas e.g. a tennis court.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

PHYSICAL TERMITE BARRIER INSTALLATION

Scope of work	Qualifications and experience
The installation of termite barriers other than chemical barriers Physical Termite Management System - a system that relies on components that, due to the physical nature of the materials used, act to deter termite passage. A physical termite management system does not rely on any insecticidal or repellent chemicals Please refer to SafeWork SA for chemical termite management systems.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

PERGOLAS, VERANDAHS & CARPORTS

PERGOLAS, VERANDAHS & CARPORTS

Scope of work	Qualifications and experience
Installation of: Pergolas open roof framework over a path, terrace or patio supported on posts or columns provides partial shade. Also includes a free-standing gazebos which provides full shade. VerandaHS a roofed space either free standing or attached to a building. & Carports a roofed space or semi enclosed structure for sheltering a motor vehicle using steel or timber.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

PERGOLAS, VERANDAHS & CARPORTS LTD TO PREFABRICATED

Scope of work	Qualifications and experience
Installation of prefabricated: Pergolas open roof framework over a path, terrace or patio supported on posts or columns provides partial shade. Also includes a free-standing gazebos which provides full shade. VerandaHS a roofed space either free standing or attached to a building. &	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

Carports a roofed space or semi enclosed structure for sheltering a motor vehicle using steel or timber.

All of the above designs and installations are determined and dependent on a professional engineer/designer determining the member sizes, spacing and fixings of the pergola, verandah or carport.

SHEDS & GARAGES LTD TO NATIONAL CONSTRUCTION CODE CLASS 10

Scope of work	Qualifications and experience
Residential sheds & garages in any form of construction.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

SHEDS AND GARAGES LTD TO PREFABRICATED NATIONAL CONSTRUCTION CODE CLASS 10

Scope of work	Qualifications and experience
Restricted to prefabricated Residential sheds & garages eg a kit shed.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

SHEDS AND GARAGES LTD TO PREFABRICATED COMMERCIAL

Scope of work	Qualifications and experience
<p>Erection of prefabricated commercial and farm sheds. Includes site preparation, installation of concrete pier footings (not strip or raft footings and does not include concrete floor paving), erection of structural steel frame, cladding and roof plumbing. May include rural buildings, a hot house or other commercial shed.</p> <p>Non-prefabricated commercial sheds refer to Structural steel erection</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

PLUMBING, GAS FITTING, ELECTRICAL & PV SOLAR PANEL

PLUMBING

Scope of work	Qualifications and experience
<p>Must be an unrestricted registered plumber (independent worker) under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p> <p>Excludes an apprentice, a person under technical direction or other restriction.</p> <p>The plumbing endorsement can only be issued to the value of the registration held.</p> <p><i>Regulations 4(1)(h)</i></p>	<p>Must hold the qualifications and experience (as evidenced by registration) required to be a registered plumbing worker under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p> <p>Any limitations are set to match the scope of the plumbing workers registration the applicant qualifies for.</p>

GAS FITTING

Scope of work	Qualifications and experience
<p>Must be a registered gas fitter under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p> <p>The gas fitting endorsement can only be issued to the value of the registration held.</p> <p><i>Regulations 4(1)(h)</i></p>	<p>Must hold the qualifications and experience (as evidenced by registration) required to be a registered gas fitting worker under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p> <p>Any limitations are set to match the scope of the gas fitting workers registration the applicant qualifies for.</p>

ELECTRICAL

Scope of work	Qualifications and experience
<p>Must be a registered electrician under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p> <p>The electrical endorsement can only be issued to the value of the registration held.</p> <p><i>Regulations 4(1)(h)</i></p>	<p>Must hold the qualifications and experience (as evidenced by registration) required to be a registered electrical worker under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p> <p>Any limitations are set to match the scope of the electrical workers registration the applicant qualifies for.</p>

PV SOLAR PANEL INSTALLATION

Scope of work	Qualifications and experience
<p>Install support tilt systems for PV solar panels which include mounting frames, modifying or reinforcing roof framing, integrating the solar panel system with a pre-existing structure; Includes the erecting of standalone structures, solar panel product installations (solar battery array).</p> <p>Note: Installation of solar panels that are fitted to the pitch of the roof, no more than 100mm off the roof and do not apply more than 100kg load at any point of contact with the roof can be installed by a registered electrician.</p> <p>To qualify for solar credits, the installation of PV solar panels and the connection to electricity supply must be completed by a registered electrician accredited by the Clean Energy Council (CEC) and the AIBS- SA Supplementary training for solar Photovoltaic panel installers on-line Course (in South Australia).</p> <p><i>Regulations 4(1)(g)</i></p>	<p>Pathway 1 Currently holds an unrestricted electrical workers registration with CEC Accreditation AND Completion of the AIBS on-line supplementary training for South Australian installers which satisfies Schedule 4 (16)(3)(b)(iv) of the Planning, Development and Infrastructure (General) Regulations 2017. The AIBS on-line course can be accessed here: Australian Institute of Building Surveyors - SA Supplementary Training for Solar Photovoltaic Panel Installers</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application and holds CEC Accreditation.</p>

STORMWATER DRAINAGE LTD TO 90MM

Scope of work	Qualifications and experience
<p>Installation of storm water pipes not exceeding 90mm in diameter and includes stormwater pipes and equipment that are not installed to collect and convey stormwater to a public stormwater disposal system</p> <p>Please note: does not include the physical performance of stormwater drainage greater than 90mm unless registered to perform that work under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

WATER FEATURES

Scope of work	Qualifications and experience
<p>The construction of water features and ponds. Does not include the construction of swimming pools, spas or barrier fencing. Includes the installation, repair or maintenance of a non-testable backflow prevention device and cold-water pipes not exceeding 25mm in diameter, except where the pipe is in or on a building</p> <p>Note: All plumbing work that is connected directly or indirectly to a public water supply must be performed by an appropriately registered plumber as defined by the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

RETAINING WALLS

RETAINING WALLS

Scope of work	Qualifications and experience
All retaining walls without restriction. Includes excavation, drainage and footings.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

RETAINING WALLS LTD TO 1M IN HEIGHT

Scope of work	Qualifications and experience
All retaining walls up to 1m high. Includes preparation e.g. earthworks and drainage excavation, drainage and footings.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

ROLLER DOORS, SHUTTERS AND SCREENS

ROLLER DOORS, ROLLER SHUTTERS AND SEGMENTAL LIFT DOORS

Scope of work	Qualifications and experience
Installation of all roller doors, security/roller shutters, segmental lift doors.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

SECURITY DOORS & SCREENS

Scope of work	Qualifications and experience
Installation of: Security door – a protective cover for door to protect an internal space in the building from undesirable intrusion. Security screen - a protective cover for external window to protect internal space in the building from undesirable intrusion.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

EXTERNAL BLINDS AND SCREENS

Scope of work	Qualifications and experience
Café Blinds (plastic or mesh) and awnings including all tracks and support mechanisms or structures.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

SHOWER SCREENS AND BATHROOM FITTINGS

Scope of work	Qualifications and experience
Installation of bathroom fittings e.g. shower screens, mirrors, handrails, shaving cabinets, towel rails and the like. Includes commercial toilet partitioning systems.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

ROOFING

ROOF RESTORATION

Scope of work	Qualifications and experience
Repairing gutters, fascia's, tile battens, purlins, down pipes, re-bedding and repointing capping tiles and replacing cracked and broken tiles and includes surface preparation and painting metal and tiled roofs no restriction to class of building.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

ROOF PLUMBING

Scope of work	Qualifications and experience
Installation and repair of metal roof sheeting and wall cladding including gutters, down pipes, sarking and the restoration of metal roofs. Includes the installation of skylights and whirly birds on metal roofs on all classes of buildings with a skillion, truss or conventional roof. May also replace roof tiles with metal roof sheeting.	Pathway 1 Completion of an Australian-based apprenticeship - Roof Plumbing Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 3 Held an equivalent registration within 12 months prior to this application.

ROOF TILING

Scope of work	Qualifications and experience
Installation of pressed or moulded concrete, terracotta, pressed metal tiles or slate used to form the weatherproof covering for a roof.	<p>Pathway 1 Completion of an Australian-based apprenticeship - Roof Tiling</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

SKYLIGHT OR ROOF VENTILATOR INSTALLATION

Scope of work	Qualifications and experience
Installation of: Skylight – clear or translucent glazed opening in or slightly above, the plane of the roof to admit natural light and sometimes ventilation to the space below. Roof ventilator – a mechanical ventilation system fitted to the roof to assist the movement of air and its replacement with fresh air within a building or an enclosure.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

PLASTERING

SOLID PLASTERING

Scope of work	Qualifications and experience
Plastering walls internally and externally using plaster compounds, mixed on site or premixed, including building up quoins and bands and white set plaster finish. Also includes texture coating, render coating and mortar coating.	Pathway 1 Completion of an Australian-based apprenticeship - Plastering (Solid and/or Fibrous) Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 3 Held an equivalent registration within 12 months prior to this application.

RENDERING & TEXTURE COATING

Scope of work	Qualifications and experience
Render coating - the application of proprietary, modified cement render, levelling and finishing compounds (supplied in dry powder form requiring the addition of water) to form a surface levelling render mix to masonry, concrete and sheet surfaces or the like as a base coat. Texture coating - the application of proprietary durable decorative coatings to plastered, rendered and sheet surfaces or the like.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

STRUCTURAL STEEL

STRUCTURAL STEEL ERECTION

Scope of work	Qualifications and experience
Installation of heavy steel framework and light steel framing. Includes onsite fabrication and installation of steel framework in commercial structures. (formally Structural steel fabrication)	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

STRUCTURAL SIGNS

Scope of work	Qualifications and experience
Free standing or attached signs requiring engineer design resulting from their size or attachment to a building. Includes installation of additional structure requirements for attachment to the building or footings and structural steel erection in the case of free-standing signs. An endorsed building work contractor is able to sub-contract any electrical installation and connection to a licensed electrician. Note: All electrical work must be performed by an appropriately registered electrician as defined by the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

METAL FABRICATED PRODUCT INSTALLATION

Scope of work	Qualifications and experience
Includes handrails in showers, ramps or disabled facilities, metal ramps, sheet metal splashbacks, building access systems e.g. ladders, walkways, harness connection systems and roof access stairs to buildings. Can include alternative materials such as fibre reinforced polyester or the like. For example a bank of letterboxes attached to a wall; the Installation of pallet racks metal (or other material); tactile indicators that are drilled into a floor and epoxy fitted; bollard installation; or safety barriers.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

SWIMMING POOL AND SPA

SWIMMING POOL CONSTRUCTION

Scope of work	Qualifications and experience
<p>Construction of concrete pools or installation of prefabricated (fibreglass, spas or the like) or precast concrete pools including all earthworks, pool plumbing, finishing of concrete surfaces, fencing and gates of the pool area (within the pool fencing). May also include copings, paving or tiling around the pool, and pool plant (a small shed to contain filters, heat pumps and the like).</p> <p>Includes above ground pool installation.</p> <p>This scope of work also includes Wall & floor tiling ltd to external which includes waterproofing, placement of screed, wall & floor tiling to verandahs and external structures (within the pool fencing). Includes swimming pool tiling but excludes wet areas and balconies.</p> <p><i>Regulations 4(1)(a)</i></p>	<p>Pathway 1 Successful completion of Certificate IV in Swimming Pool and Spa Building (CPC40820) including completion of the following units of competency:</p> <ul style="list-style-type: none"> • CPCSPS4003 Install swimming pool & spa subsoil drainage • CPCSPS4004 Install swimming pool & spa circulation systems & components • CPCSPS4005 Install prefabricated fibreglass swimming pools • CPCSPS4006 Apply sprayed concrete to shape and finish swimming pools and spas <p>Pathway 2 Holds a current supervisor registration endorsed "SWIMMING POOL CONSTRUCTION LTD TO INSTALLATION OF CONCRETE POOLS" and Successful completion of Certificate IV in Swimming Pool and Spa Building (CPC40820) including completion of the following unit of competency:</p> <ul style="list-style-type: none"> • CPCSPS4003 Install swimming pool & spa subsoil drainage • CPCSPS4004 Install swimming pool & spa circulation systems & components • CPCSPS4005 Install prefabricated fibreglass swimming pools <p>Pathway 3 Holds a current supervisor registration endorsed "SWIMMING POOL CONSTRUCTION LTD TO INSTALLATION OF PREFABRICATED POOLS" and Successful completion of Certificate IV in Swimming Pool and Spa Building (CPC40820) including completion of the following unit of competency:</p> <ul style="list-style-type: none"> • CPCSPS4003 Install swimming pool & spa subsoil drainage • CPCSPS4004 Install swimming pool & spa circulation systems & components • CPCSPS4006 Apply sprayed concrete to shape and finish swimming pools and spas <p>Pathway 4 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 5 Held an equivalent registration within 12 months prior to this application.</p>

SWIMMING POOL CONSTRUCTION LTD TO INSTALLATION OF CONCRETE POOLS

Scope of work	Qualifications and experience
<p>Construction of concrete pools and installation of precast concrete pools including all earthworks, pool plumbing, finishing of concrete surfaces, fencing and gates of the pool area (within the pool fencing). May also include copings, paving or tiling around the pool, and pool plant (a small shed to contain filters, heat pumps and the like).</p> <p>Includes above ground pool installation.</p> <p>This scope of work also includes Wall & floor tiling ltd to external which includes waterproofing, placement of screed, wall & floor tiling to verandahs and external structures (within the pool fencing). Includes swimming pool tiling but excludes wet areas and balconies.</p> <p><i>Regulations 4(1)(a)</i></p>	<p>Pathway 1 Successful completion of Certificate IV in Swimming Pool and Spa Building (CPC40820) including completion of the following units of competency:</p> <ul style="list-style-type: none"> • CPCSPS4003 Install swimming pool & spa subsoil drainage • CPCSPS4004 Install swimming pool & spa circulation systems & components • CPCSPS4006 Apply sprayed concrete to shape and finish swimming pools and spas <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

SWIMMING POOL CONSTRUCTION LTD TO INSTALLATION OF PREFABRICATED POOLS

Scope of work	Qualifications and experience
<p>Installation of prefabricated (fibreglass pools, spas or the like) or precast concrete pools including all earthworks, pool plumbing, finishing of concrete surfaces, fencing and gates, of the pool area (within the pool fencing). May also include copings, paving or tiling around the pool, and pool plant (which may include a small shed to contain filters, heat pumps and the like).</p> <p>Includes above ground pool installation.</p> <p>This scope of work also includes Wall & floor tiling ltd to external which includes waterproofing, placement of screed, wall & floor tiling to verandahs and external structures (within the pool fencing). Includes swimming pool tiling but excludes wet areas and balconies.</p> <p><i>Regulations 4(1)(a)</i></p>	<p>Pathway 1 Successful completion of Certificate IV in Swimming Pool and Spa Building (CPC40820) including completion of the following units of competency</p> <ul style="list-style-type: none"> • CPCSPS4003 Install swimming pool & spa subsoil drainage • CPCSPS4004 Install swimming pool & spa circulation systems & components • CPCSPS4005 Install prefabricated fibreglass swimming pools <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application</p>

SWIMMING POOL CONSTRUCTION LTD TO THE INSTALLATION AND MAINTENANCE OF PUMPS, FILTRATION EQUIPMENT, CHLORINATORS, HEATERS AND ASSOCIATED PIPE WORK

Scope of work	Qualifications and experience
Installation and maintenance of pumps, filtration equipment, chlorinators, heaters and associated pipe work for swimming pools, spas or ponds. (formally Swimming pool pumps, filtration equipment & associated pipe work)	<p>Pathway 1 Successful completion of Certificate III in Swimming Pool and Spa Service (CPP31218)</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

SPA POOL INSTALLATION

Scope of work	Qualifications and experience
Installation of in-ground water-retaining structure for use by a number of people, that has the facility for heating the water within it and injecting air bubbles or jets of turbulent water. Excludes, spa baths and spas incorporated into swimming pool construction. <i>Regulations 4(1)(a)</i>	<p>Pathway 1 Successful completion of Certificate IV in Swimming Pool and Spa Building (CPC40820)</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

WALL AND FLOOR TILING

WALL & FLOOR TILING

Scope of work	Qualifications and experience
<p>Includes waterproofing of wet areas, placement of screed, wall and floor tiling to bathrooms, WC, laundry, kitchen, living areas, verandahs and balconies.</p> <p>Not endorsed to replace wall linings or substrate but may patch and or prepare the surface for the waterproofing and tiling.</p> <p>Wet area - means an area within a building supplied with water from a water supply system, which includes bathrooms, showers, laundries and sanitary compartments and excludes kitchens, bar areas, kitchenettes or domestic food and beverage preparation areas.</p>	<p>Pathway 1 Completion of an Australian-based apprenticeship - Tiling (Wall and Floor)</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

WALL & FLOOR TILING EXCLUDING WET AREAS

Scope of work	Qualifications and experience
<p>The laying of tiles to walls and floors of all areas other than wet areas as defined by the Building Code of Australia. Includes under tile membrane and placement of screed.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application</p>

WALL & FLOOR TILING LTD TO EXTERNAL

Scope of work	Qualifications and experience
<p>Includes waterproofing, placement of screed, wall & floor tiling to verandahs and external structures. Includes swimming pool tiling but excludes wet areas (as defined by the Building Code of Australia) and balconies.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application</p>

WATERPROOFING

CONSTRUCTION WATERPROOFING

Scope of work	Qualifications and experience
All forms of water proofing of wet areas, balconies, concrete roof and concourses, retaining walls and the like (Includes commercial caulking and construction joints in roadways) Wet area - means an area within a building supplied with water from a water supply system, which includes bathrooms, showers, laundries and sanitary compartments and excludes kitchens, bar areas, kitchenettes or domestic food and beverage preparation areas.	Pathway 1 Completion of Traineeship - Construction Waterproofer Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 3 Held an equivalent registration within 12 months prior to this application.

WATER PROOFING OF WET AREAS AND BALCONIES

Scope of work	Qualifications and experience
Water proofing where required in preparation for the application of wall and floor tiles. Includes balconies.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

CAULKING

Scope of work	Qualifications and experience
All forms of caulking of internal and external wet areas, balconies, concrete roof and concourses, retaining walls and the like (Includes commercial caulking and construction joints in roadways). Also includes sealant or silicone caulking internally to wet areas and other internal areas that need silicone such as kitchens, laundries and skirting/floor junctions.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

CAULKING EXCLUDING EXTERNAL AREAS

Scope of work	Qualifications and experience
Sealant or silicone caulking internally to wet areas and other internal areas that need silicone such as kitchens, laundries and skirting/floor junctions.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

WATER TANK INSTALLATION

WATER TANK INSTALLATION

Scope of work	Qualifications and experience
Installation of rainwater or other water requiring storage in tanks without restriction. Includes rain, dam or bore water tanks, above or below ground.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

WATER TANK INSTALLATION LTD TO ABOVE GROUND

Scope of work	Qualifications and experience
Installation of rainwater or other water requiring storage in tanks but limited to above ground tanks only. Includes rain, dam or bore water tanks.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

OTHER BUILDING WORK

COMBUSTION HEATER INSTALLATION

Scope of work	Qualifications and experience
Installation of enclosed solid fuelled burning heating devices either built into existing fireplaces or freestanding.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

COOL ROOMS

Scope of work	Qualifications and experience
Installation of insulation panels forming a temperature-controlled room.	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

ENERGY AND TELECOMMUNICATIONS INFRASTRUCTURE INSTALLATION

Scope of work	Qualifications and experience
Includes structural steel erection, footings for antennas, floors and footings for machinery or the like, installation of energy infrastructure and distribution equipment (including commercial solar farms, wind generators and associated batteries), associated earthworks, fences and small buildings to house the electrical and communications equipment. Note: All electrical work must be performed by an appropriately registered electrician as defined by the <i>Plumbers, Gas Fitters and Electricians Act 1995</i> .	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

ESCALATORS, LIFTS AND MOVING WALKWAYS

Scope of work	Qualifications and experience
Installation, alteration and repair of the following: Escalator – Power driven endless moving stair for the conveyance of passengers in an upward or downward direction. Lifts/Elevator – a platform, chair or enclosed apparatus attached to a building or structure used as a means of conveyance for passengers or goods either vertically or up an incline such as a staircase (Includes prefabricated elevators or stair lifts).	Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview. Pathway 2 Held an equivalent registration within 12 months prior to this application.

Moving walkway – A power driven endless conveyor moving parallel to direction of motion on which pedestrians stand or walk with a slope of less than 15 degrees. Also known as moving pathway or travelator.

GENERAL REPAIRS LTD TO NON-STRUCTURAL BUILDING WORK

Scope of work	Qualifications and experience
Non-structural repairs e.g. replace a broken piece of glass, repair a hole in a plaster board wall, fix a leaking gutter, replace a roof sheet or broken tiles on a roof, Re-grout and replace silicone, timber repairs or to make as new through painting the affected area of repair. Partial replacement or mending of worn, damaged or degraded parts of a building.	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

GLAZING EXCLUDING POOL FENCING AND BALUSTRADES

Scope of work	Qualifications and experience
<p>Installation of glass, acrylic or other like materials into prepared openings, in windows, door panels, partitions shower screens and mirrors and the like (Within the Australian Standard - Windows and external glazed doors in buildings).</p> <p>Note: This condition does not include pool fencing and balustrades. Please refer to Pool fences and Balustrades for an appropriate additional licence condition.</p>	<p>Pathway 1 Completion of an Australian-based apprenticeship - Glazier</p> <p>Pathway 2 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 3 Held an equivalent registration within 12 months prior to this application.</p>

SHADE SAILS

Scope of work	Qualifications and experience
<p>Installation of tensioned pliable fabric for sun and/or water protection. Installation of a shade sail that is attached to a building or free standing includes all structural supports.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

TRANSPORTABLE BUILDING INSTALLATION

Scope of work	Qualifications and experience
<p>Site levelling and installation of stumps for a transportable building includes installation of verandahs and decks and organising the connection of plumbing and electrical work.</p> <p>Doesn't include the physical performance of associated plumbing, gas fitting or electrical work unless registered to perform that work under the <i>Plumbers, Gas Fitters and Electricians Act 1995</i>.</p>	<p>Pathway 1 Demonstration of knowledge and experience through satisfactory completion of the Work History & Onsite Experience record to be entitled to attend a building interview.</p> <p>Pathway 2 Held an equivalent registration within 12 months prior to this application.</p>

Schedule 2 (Part 2)

Building work supervisors registration performance criteria

Regulation 11(2) provides that for the purposes of section 16 of the Act, to be entitled to be granted registration as a building work supervisor, a natural person must have qualifications or experience, or qualifications and experience, such that the person meets the performance criteria set out in the table below to the satisfaction of the Commissioner in *relation to the kind of work that the registration would authorise the person to supervise*.

UNIT		
1 Building Work Management		
Applying the principles of building work management in relation to the supervision of a building site.		
ELEMENT	PERFORMANCE CRITERIA	
1.1 Planning and organising on-site building work.	1.1.1	Translate building designs and specifications into operational requirements.
	1.1.2	Develop strategies for implementing building operations.
	1.1.3	Determine appropriate resources required including personnel, materials and equipment.
1.2 Determining the need for coordination and installation of temporary structures and facilities for building work.	1.2.1	Determine the requirements for temporary structures and facilities.
	1.2.2	Demonstrate a working knowledge of the most appropriate methods for provision of site facilities and preparation of detailed site layouts.
	1.2.3	Coordinate the on-site approvals of temporary structures.
	1.2.4	Arrange for and supervise the supply, erection, maintenance and removal of temporary structures and facilities.
1.3 Preparing project schedules.	1.3.1	Prepare schedules for building work.
	1.3.2	Update schedules.
	1.3.3	Prepare reports on current status.
	1.3.4	Assess the need for and select measures to overcome delays.
1.4 Managing on-site building work.	1.4.1	Supervise on-site operations.
	1.4.2	Administer subcontracts.
	1.4.3	Administer progress claims.
	1.4.4	Organise the supply and installation of materials and equipment.
	1.4.5	Manage appropriate operational systems including occupational health and safety, accident and injury reporting, and industrial relations.
	1.4.6	Plan, develop and oversee safe working systems for all site work.
	1.4.7	Communicate effectively with personnel on and off the site.

UNIT

2 Building Technology

Applying the principles of building technology to on-site building work.

ELEMENT	PERFORMANCE CRITERIA
2.1 Applying the principles of building work practice.	<div data-bbox="432 394 1522 607"><div data-bbox="432 394 1238 423">2.1.1 Select and apply building principles and methods including—</div><div data-bbox="608 439 1123 607"><div data-bbox="608 439 1002 470">(a) appraisal of site conditions;</div><div data-bbox="608 486 1123 517">(b) erection and construction techniques;</div><div data-bbox="608 533 935 564">(c) sequencing of trades;</div><div data-bbox="608 580 1046 607">(d) control of plant and equipment.</div></div></div> <div data-bbox="432 622 1522 842"><div data-bbox="432 622 986 651">2.1.2 Demonstrate a working knowledge of—</div><div data-bbox="555 667 1449 842"><div data-bbox="555 667 1086 698">(a) the use of basic measuring techniques;</div><div data-bbox="555 714 1449 745">(b) the setting up and use of instruments to determine heights and levels;</div><div data-bbox="555 761 863 792">(c) demolition methods;</div><div data-bbox="555 808 826 842">(d) formwork design.</div></div></div> <div data-bbox="432 857 916 887">2.1.3 Interpret plans and specifications.</div> <div data-bbox="432 902 1286 934">2.1.4 Produce simple working drawings suitable for on-site application.</div> <div data-bbox="432 949 959 978">2.1.5 Identify and select suitable materials.</div> <div data-bbox="432 994 1449 1025">2.1.6 Control the movement of materials on-site and their safe handling and storage.</div> <div data-bbox="432 1041 1522 1308"><div data-bbox="432 1041 911 1070">2.1.7 Apply a basic understanding of—</div><div data-bbox="555 1086 1206 1308"><div data-bbox="555 1086 1206 1120">(a) properties and behaviours of structural materials;</div><div data-bbox="555 1135 1126 1167">(b) sectional properties of structural elements;</div><div data-bbox="555 1182 948 1214">(c) structural load calculations;</div><div data-bbox="555 1229 1161 1261">(d) performance of beams, columns and bracing;</div><div data-bbox="555 1276 995 1308">(e) utilisation of roof truss systems.</div></div></div> <div data-bbox="432 1323 1522 1523"><div data-bbox="432 1323 1477 1384">2.1.8 Apply the basic principles of estimating and demonstrate a working knowledge of take-off quantities for—</div><div data-bbox="555 1400 820 1523"><div data-bbox="555 1400 751 1431">(a) site works;</div><div data-bbox="555 1447 735 1478">(b) structure;</div><div data-bbox="555 1494 820 1523">(c) fit-out and finish.</div></div></div> <div data-bbox="432 1538 1477 1599">2.1.9 Demonstrate a general knowledge of the process of the coordination of specialist services on-site.</div>

UNIT

3 Legislative requirements

Applying a detailed knowledge of legislative requirements in respect of on-site building work.

ELEMENT**PERFORMANCE CRITERIA**

3.1 Applying the requirements of legislation, standards and codes relevant to on-site building work.	3.1.1	Identify the range of legislation applying to building work.
	3.1.2	Apply the requirements of legislation and relevant standards and codes to the coordination and supervision of on-site building work.
	3.1.3	Understand the requirements of relevant legislation, standards and codes to the performance of residential, commercial and industrial building work.
